

Single paragraph biography Monique van Hulst PARARI 2019

Monique van Hulst works at the Dutch independent research organisation TNO for a little bit more than thirteen years. She has a background in the field of Analytical Chemistry. One of the topics she works in together with a toxicologist since 2008 is ammunition-toxicology. Over the years together they performed various studies. In 2014 she co-chaired the first NATO-group as "leading Nation" on this topic, which will be finalized this year with a NATO report, co-chaired also as "leading Nation" NATO specialists meeting at the beginning of this year in Slovakia and is planning to co-chair as "leading Nation" the follow-up NATO-group on "Improving the Understanding of Risks from Exposure to Munition Combustion Products".
