CRICOS No. 00098G
356858852

EMPOWER OUR FEMALE STUDENTS FOR FUTURE GENERATIONS!

Less than 14% of degree qualified engineers in Australia are women, we can do better! Let's highlight their talents to achieve engineering excellence.

Encourage students to attend our amazing workshop to experience fun university level engineering first hand. Activities include:

- Build and fly a rocket and gas turbine engine
- Design, build and fly a satellite remotely
- Disassemble and reassemble an engine
- Solder and program a circuit, command a robot to solve a problem
- Design, build and test a dam

Meet innovative and inspirational female students, graduates, staff and guest speakers. Together let's support, guide and assist female students to discover their future.
